

# NATIONAL

ELECTRIC WIRE COMPANY

## RoHS Directive Certificate of Compliance

National Electric Wire Company acknowledges European Union issued Directive 2002/95/EC (RoHS). As National Electric Wire Company is not a lab and does not perform testing specifically for these substances, we rely on Supplier RoHS Compliance Certifications for the raw materials that we purchase and process. National Electric Wire Company, an ISO 9001:2008 certified company, obtains updated and/or re-certifications for RoHS from major suppliers annually, or as needed. As our suppliers have indicated compliance, we therefore certify that our metals will not exceed the following limits:

- |   |           |
|---|-----------|
| • Cadmium (Cd)                            | 0.01% max |
| • Lead (Pb)                               | 0.1% max  |
| • Hexavalent Chromium (Cr <sup>6+</sup> ) | 0.1% max  |
| • Mercury (Hg)                            | 0.1% max  |
| • Polybrominated biphenyls (PBB)          | 0.1% max  |
| • Polybrominated diphenyl ethers (PBDE)   | 0.1% max  |
